

Positive Proof of Merit

*Holmes' Bakery MUST Be Enlarged
to Meet the Growing Demand For*

HOLMES' HOME MADE MILK BREAD

Last year we baked and sold 4,160,000 loaves of Holmes' Bread (to say nothing of 1,560,000 pies and innumerable quantities of cakes)—and the demand for our bread is increasing every day! Could there be greater proof of its merit than this?

One better proof only can we suggest and that is an actual trial of Holmes' Home-made Milk Bread YOURSELF.

By selling it to you and delivering it to you DIRECT we eliminate the middleman's profit and can afford to make a far better bread in consequence—giving you your full money's value on every loaf you buy.

Home of Capital Industry to Be Enlarged to Meet Demand

HOLMES MODERN BAKERY PLANT.
Which Will Be Expanded Over Adjoining Property Just Purchased At F and First Streets Northwest.

HOLMES' BAKERY TO BE EXTENDED

Company Purchases Real Estate Near Plant to Carry Out Building Plans.

Within a year it is the expectation of Holmes & Son, proprietors of the Holmes Modern Bakery, to add a three-story building, 69x56 feet in dimensions, to their present plant on F street, between First and Second streets, northwest, completing the square now partially occupied by their buildings.

The sale this week of the property at the corner of First and F streets through the office of J. Leo Kolb to Holmes & Son has been reported. This property is now occupied by three two-story dwellings, 101 to 105 F street. All about these dwellings on two sides are the present buildings of the Holmes bakery. The new owners will be able to extend their establishment, making it a compact whole as well as largely increasing their facilities.

The first building erected by Holmes & Son was built five years ago and was used as a bread bakery. Two years later another building was erected for a pie bakery, and last year a third structure was completed, which is used as an office and for storage purposes. The whole establishment now represents an investment of \$100,000.

The business of the bread and pie bakeries has increased to such an extent that the concern was forced to acquire additional ground upon which to make additions.

Besides the corner property another piece of ground was purchased in the alley between First and Second and F and F streets, 50x150 feet in size, upon which stables and other buildings will be erected.
